Annual Meeting July 30, 2014

RII – Track -2 IIA 1330446

Welcome!! to our participants from Delaware, Rhode Island and Vermont

Graduate students, postdocs, undergraduates, staff, faculty External Advisory committee member Dr. Sidney McNairy

Overview: The NEWRnet consortium of the NSF EPSCoR jurisdictions of Delaware (DE), Rhode Island (RI), and Vermont (VT) will create an advanced **sensor network in watersheds** for gathering high-frequency, spatially-extensive water quality and quantity data and a **network of laboratories, field-based experiments, and agent-based models** to investigate how to align sensor data and its visualization with utilization by stakeholders and decision makers**. Workforce development and diversity programs** will be integrated into the research.

Begin today with introductions by State:

Delaware
Rhode Island
Vermont

External Advisory Committee

Today we will hear from our research groups on

- Sensors
- Experimental Economics
- Data management

Education outreach group

General Discussion, next steps, next meeting
